

Integrated Venetian Blind CHAIN MAGNETIC SYSTEM

Chain Magnetic System is a manually-operated magnetic system with raising and tilting functions for venetian blinds encapsulated within 22mm and 24mm cavity double glazing units.

By pulling the chain of the magnetic controlling unit fixed on the glazing, the magnetic mechanism in the headrail in the glazing moves. The chain is pulled quickly to raise or lower the blind, while the tilting movement is provided by slightly pulling the chain.

The venetian blind slats come in two different widths, 12.5 mm and 16.0 mm.

The system can be supplied either with warm edge or aluminum spacer bars according to demand.

The position of the venetian blind between insulated double glazing prevents any physical intervention. It also ensures that the blind is not dusted, contaminated, or affected by weather conditions. Thus, it does not require any maintenance and cleaning.

Suitable for every type of window frame.

COLORS

0150 White	7010 Glossy Grey	4459 Beige
